

# Slim<sup>PM</sup>

NIGHTTIME FAT BURNING CARDIOVASCULAR DRINK

STORE IN A COOL, DRY PLACE.

## MAKE IT

Mix one sachet with at least 16.9 fl. oz. cold water. Shake well until dissolved.

## TAKE IT

Best used on an empty stomach 1.5 to 2 hours prior to a full night's rest.

## DOSE

One sachet per day, no more than five consecutive days or as directed by your healthcare professional

## Burn Fat While You Sleep!

Complete your day with our three-benefit dietary supplement, designed to assist in Leptin control so you can burn fat while you sleep. Our formula promotes optimum wellness and utilizes a combination of antioxidants and L-Arginine to target cardiovascular health and endothelial cell cleansing.\*

SlimPM is a unique, high-quality formulation synergistically designed to target cardiovascular health by utilizing a combination of anti-oxidant components and L-Arginine to assist in endothelial cell cleansing, fat burning, and increased Nitric Oxide (NO) production. The increase in Nitric Oxide production within the body improves fat burning during the day and at night.

The cumulative effect of cardiovascular health, antioxidation, endothelial cell cleansing, and fat burning enables a number of components to provide double and even triple duty solutions for all the three targeted areas. SlimPM is also formulated to help stimulate the production of anti-aging mechanisms in people over the age of twenty-three., It also may assist in the toning and enhancement of body muscle mass when used as part of regular and sustained physical exercise routine. A great product, and first to the market in every respect!

## Active Ingredients:

### L-Arginine

This amino acid is a "building block" of protein. It stimulates the release of human growth hormones and other substances in the body. This, in turn, can promote strength and endurance when used as part of regular and sustained physical activity routine. It is converted in the body into a free radical chemical called nitric oxide. L-Arginine also promotes the stimulation of nitric oxide which helps to support blood flow, vascular and intramuscular circulation.

### Curcumin

This is a free radical "scavenger" and similar in nature to fish oil. It increases nitric oxide levels within the body and is a powerful anti-inflammatory agent. Nitric oxide can increase blood flow by relaxing blood vessels.

### L-Citrulline

L-citrulline is a naturally occurring amino acid found in food and also made in the body. Our bodies change L-citrulline into another amino acid called L-arginine and also to nitric oxide. L-citrulline might help increase the supply of ingredients the body needs to making certain proteins. It might also help open up veins and arteries to improve blood flow and reduce blood pressure.

### N-Acetyl L-Cysteine

N-acetyl cysteine (NAC) is used by the body to build antioxidants. Antioxidants are vitamins, minerals, and other nutrients that protect and repair cells from damage. NAC can be used to protect the liver. There's evidence it can help prevent bladder or neurologic damage caused by some drugs.

### Rhodiola Rosea (root) extract

Rhodiola is a plant. The root is used as a medicine most commonly used for increasing energy, endurance, strength, and mental capacity. It is also used as a so-called "adaptogen" to help the body adapt to and resist physical, chemical, and environmental stress. Rhodiola extracts might help protect cells from damage, regulate heartbeat, and have the potential for improving learning and memory.

### Banaba leaf extract

Banaba is an herbal remedy extracted from the leaves of Lagerstroemia speciosa, a tree native to Southeast Asia. Long used in folk medicine, banaba is available in supplement form. Proponents claim that banaba can promote weight loss and treat a wide range of health problems. Rich in corosolic acid (a substance found to possess blood-sugar-lowering, antioxidant, and anti-inflammatory properties), banaba also contains ellagitannins, a class of compounds with antioxidant effects.

### Instant BCAA 2:1:1

Instant BCAA 2:1:1 or BCAAs are known as branched-chain amino acids. They are a form of amino acids that are essential to the human diet. They work synergistically to promote tissue repair and ensure that your body is getting all of the necessary nutrients that you need. BCAA's are extremely versatile, working to increase energy levels, aid in muscle repair, cause a sharp increase in brain function, building muscle, improving exercise, improving sleep, promotes cardiovascular health and also aids kidney function.

### Choline Bitartrate

Choline is an essential nutrient that helps keep the cells and nerves working normally.

### Vanadium

Vanadium is a mineral used for treating prediabetes and diabetes, low blood sugar, high cholesterol, heart disease, tuberculosis, syphilis, a form of "tired blood" (anemia), and water retention (edema); for improving athletic performance in weight training; and for preventing cancer.

### Vitamin B12

SlimPM is formulated with vitamin B12, which has one of the largest and most elaborate chemical structures of all the vitamins. This vitamin is essential for blood cell formation and supports metabolic health within the body.

### Vitamin B5 (Pantothenic Acid)

Vitamin B5 works in conjunction with the other B vitamins to produce energy from food. It is also critical to the production of red blood cells and aids in the breakdown of fats and carbohydrates.

### Vitamin B3 (Niacinamide)

Niacinamide is a form of vitamin B3 (niacin) one of the eight B vitamins your body needs for good health. Vitamin B3 plays a vital role in converting the food you eat into usable energy and helps your body's cells carry out important chemical reactions.

### Vitamin B3 (Nicotinic Acid)

Niacin (nicotinic acid), also known as vitamin B3, is one of eight known B vitamins. It has been used for decades to lower cholesterol and reduce cardiovascular risk.

### Folate

Folate is one of the B-vitamins and is needed to make red and white blood cells in the bone marrow, convert carbohydrates into energy, and produce DNA and RNA.

### Chromium

Chromium is a mineral commonly taken to aid with body conditioning including weight loss, increasing muscle, and decreasing body fat. Chromium has also been known to help improve athletic performance, to increase energy, and to prevent age-related mental decline.

### Potassium

Potassium is a mineral that's crucial for life. Potassium is necessary for the heart, kidneys, and other organs to work normally.

## Best Used With:

**SlimAM** improves performance during exercise by increasing your physical energy\*.

**All-natural Original & Instant Iaso® detox and cleansing tea** removes & flushes harmful toxins.\*

**HSN** has branched-chain amino acids (BCAAs) to help trigger protein synthesis.\*
